# Watford Town Hall Subway

A True Transformation

# Watford Town Hall

Case number: 001011

## The project

WallSpace and Community Clean joined forces with Watford Borough Council to fully refurbish the central Town Hall Subway. The council was looking for an innovative system to transform the dark and dreary subway, making it safer and more appealing for the public.

As a solution we put forward our proposal for the WallSpace system, enabling the council to promote its vision for Watford ‘a successful town in which people are proud to live, work, study and visit’ - through a series of framed images of local heroes and popular places in the town.

We were thrilled to be appointed as the principal contractor for this project, to also include the refurbishment of the soffits, wing walls, acoustic panels, kick boards and hand rails.

## The benefits

A full colour wall wrap system that can be used to “decorate” any wall, with any high quality image.

- The film can be printed with any photo quality design required
- It is then over laminated with an anti-graffiti film
- The system is class 0 fire rated and is designed to be non-flammable
- This system will last at least 5 years (potentially a lot longer in a subway environment)
- It can be applied to any wall - it takes up the contours of the surface, effectively shrink wrapping the surface

- If the finish is vandalised in any way, individual panels can be removed and replaced very quickly - saving time and money
- Effective edge finishing to minimise vandalism
- Extremely cost effective due to the speed of application
- Full maintenance packages can be provided after installation

## The outcome

All parties are extremely happy with the finished project and as you can see the subway has been totally transformed.

The feedback from members of the public, staff and residents has all been very positive and the chosen images/design has generated a huge amount of interest. The Town Hall subway is now a light, bright, attractive area within the community.

“The Town Hall subway proved to be quite an awkward space, with differing heights and angles throughout - especially in relation to the design we wanted. The team at WallSpace and Community Clean were fantastic throughout the process, working hard with us to get the final look just right and delivered on schedule. We are really pleased with the result and feedback so far has been very positive.”
